### Voice Annunciation Control

#### *Multi-channel*

The eVOXCON/EE508VIF, a universal, multi-channel, custom recordable voice annunciation control from EE Systems Group features on-board microphone and line-in/ out for processing with PA, PC, audio tape player/recorder and CD/DVD/MP3 systems. The device allows a maximum of 16-minutes of message storage in permanent memory, has versatile triggers and dual volume controls. The voice message can be divided automatically into each pre-selected channel. The wide LCD displayer gives out all setting information of eVOXCON and offers user-friendly operation.
